Ebooks printing and downloading

File formats

Cambridge Core and Oxford Scholarship Online platforms supply titles in PDF format enabling sections and chapters to be downloaded for a specified loan period to mobile and other devices. At the end of the loan period, the PDF files expire and are no longer accessible.

ACSM Digital Rights Management

Dawsonera, Ebook Central and EBSCO e-books provide ePub and PDF formats accessible as ACSM files. In order to read ACSM files you will require an Adobe ID to use with Adobe Digital Editions on a PC/MAC. Alternatively you can use your Adobe ID with the Bluefire Reader App on Apple and Android devices to download ebooks to your device.

Both Adobe Digital Editions and the Bluefire Reader app are free to download.

Printing and downloading

Publishers determine how many pages can be downloaded and printed by users from their ebooks in the different platforms. Generally this is either 10% of a book or a single chapter.

A warning message will be displayed onscreen to indicate that “You are only permitted to download 10% of the total pages contained in this title. You currently have [a number will be specified] pages remaining”. You will need to readjust the page range in order to proceed.

Note that you can only print (up to the normal copyright allowance set by the publishers) directly from the title within Ebook Central, dawsonera and EBSCO e-books not from saved or downloaded content to a computer, tablet or other device such as a USB drive.
